

# Création / Gestion

Image docker utilisée : <https://hub.docker.com/r/itzg/minecraft-server>

## Emplacement du docker compose:

/docker/minecraft

## Lancer le compose

```
sudo docker-compose up -d
```

## Accéder au terminal Minecraft

Si il demande un mdp: **ElipseHuit6**

```
docker exec -i mc rcon-cli
```

*ctrl-c pour quitter*

## Accéder au terminal docker du container

```
docker attach --sig-proxy=false mc
```

*ctrl-c pour quitter*

## Accéder au logs du serveur

```
docker logs -t mc
```

## Emplacement des settings du serveur minecraft:

/mydisk/partb1/container-conf/minecraft/data

### **docker-compose.yml :**

```
version: "3.8"

services:
  minecraft:
    image: itzg/minecraft-server
    container_name: mc
    ports:
```

```
- "25565:25565"
```

```
volumes:
```

```
- "/mydisk/partb1/container-conf/minecraft/data:/data"
```

```
environment:
```

```
EULA: "TRUE"
```

```
ENABLE_RCON: "true"
```

```
RCON_PASSWORD: "ElipseHuit6"
```

```
RCON_PORT: 28016
```

```
# Server pause when nobody connected:
```

```
ENABLE_AUTOPAUSE: "TRUE"
```

```
AUTOPAUSE_TIMEOUT_EST: 240
```

```
AUTOPAUSE_TIMEOUT_INIT: 120
```

```
AUTOPAUSE_TIMEOUT_KN: 120
```

```
INIT_MEMORY: 1G
```

```
MAX_MEMORY: 6G
```

```
volumes:
```

```
  minecraft:
```

(VIEUX) Créer et lancer le Serveur (utiliser docker compose maintenant)

```
docker run -e EULA=TRUE -d -p 25565:25565 -v /mydisk/partb1/container-conf/minecraft/data:/data  
--name mc itzg/minecraft-server
```

---
